

TRACK IT

Bridging the Gap Between Academic Education and Job Market Requirements

WHY TRACK IT?

- ATS Barrier:** Many qualified candidates rejected by Applicant Tracking Systems before human review
- Market Awareness Gap:** Students lack understanding of their actual standing in the job market
- Education-Industry Disconnect:** Few tools provide personalized guidance based on individual skill levels

IMPLEMENTATION PLAN

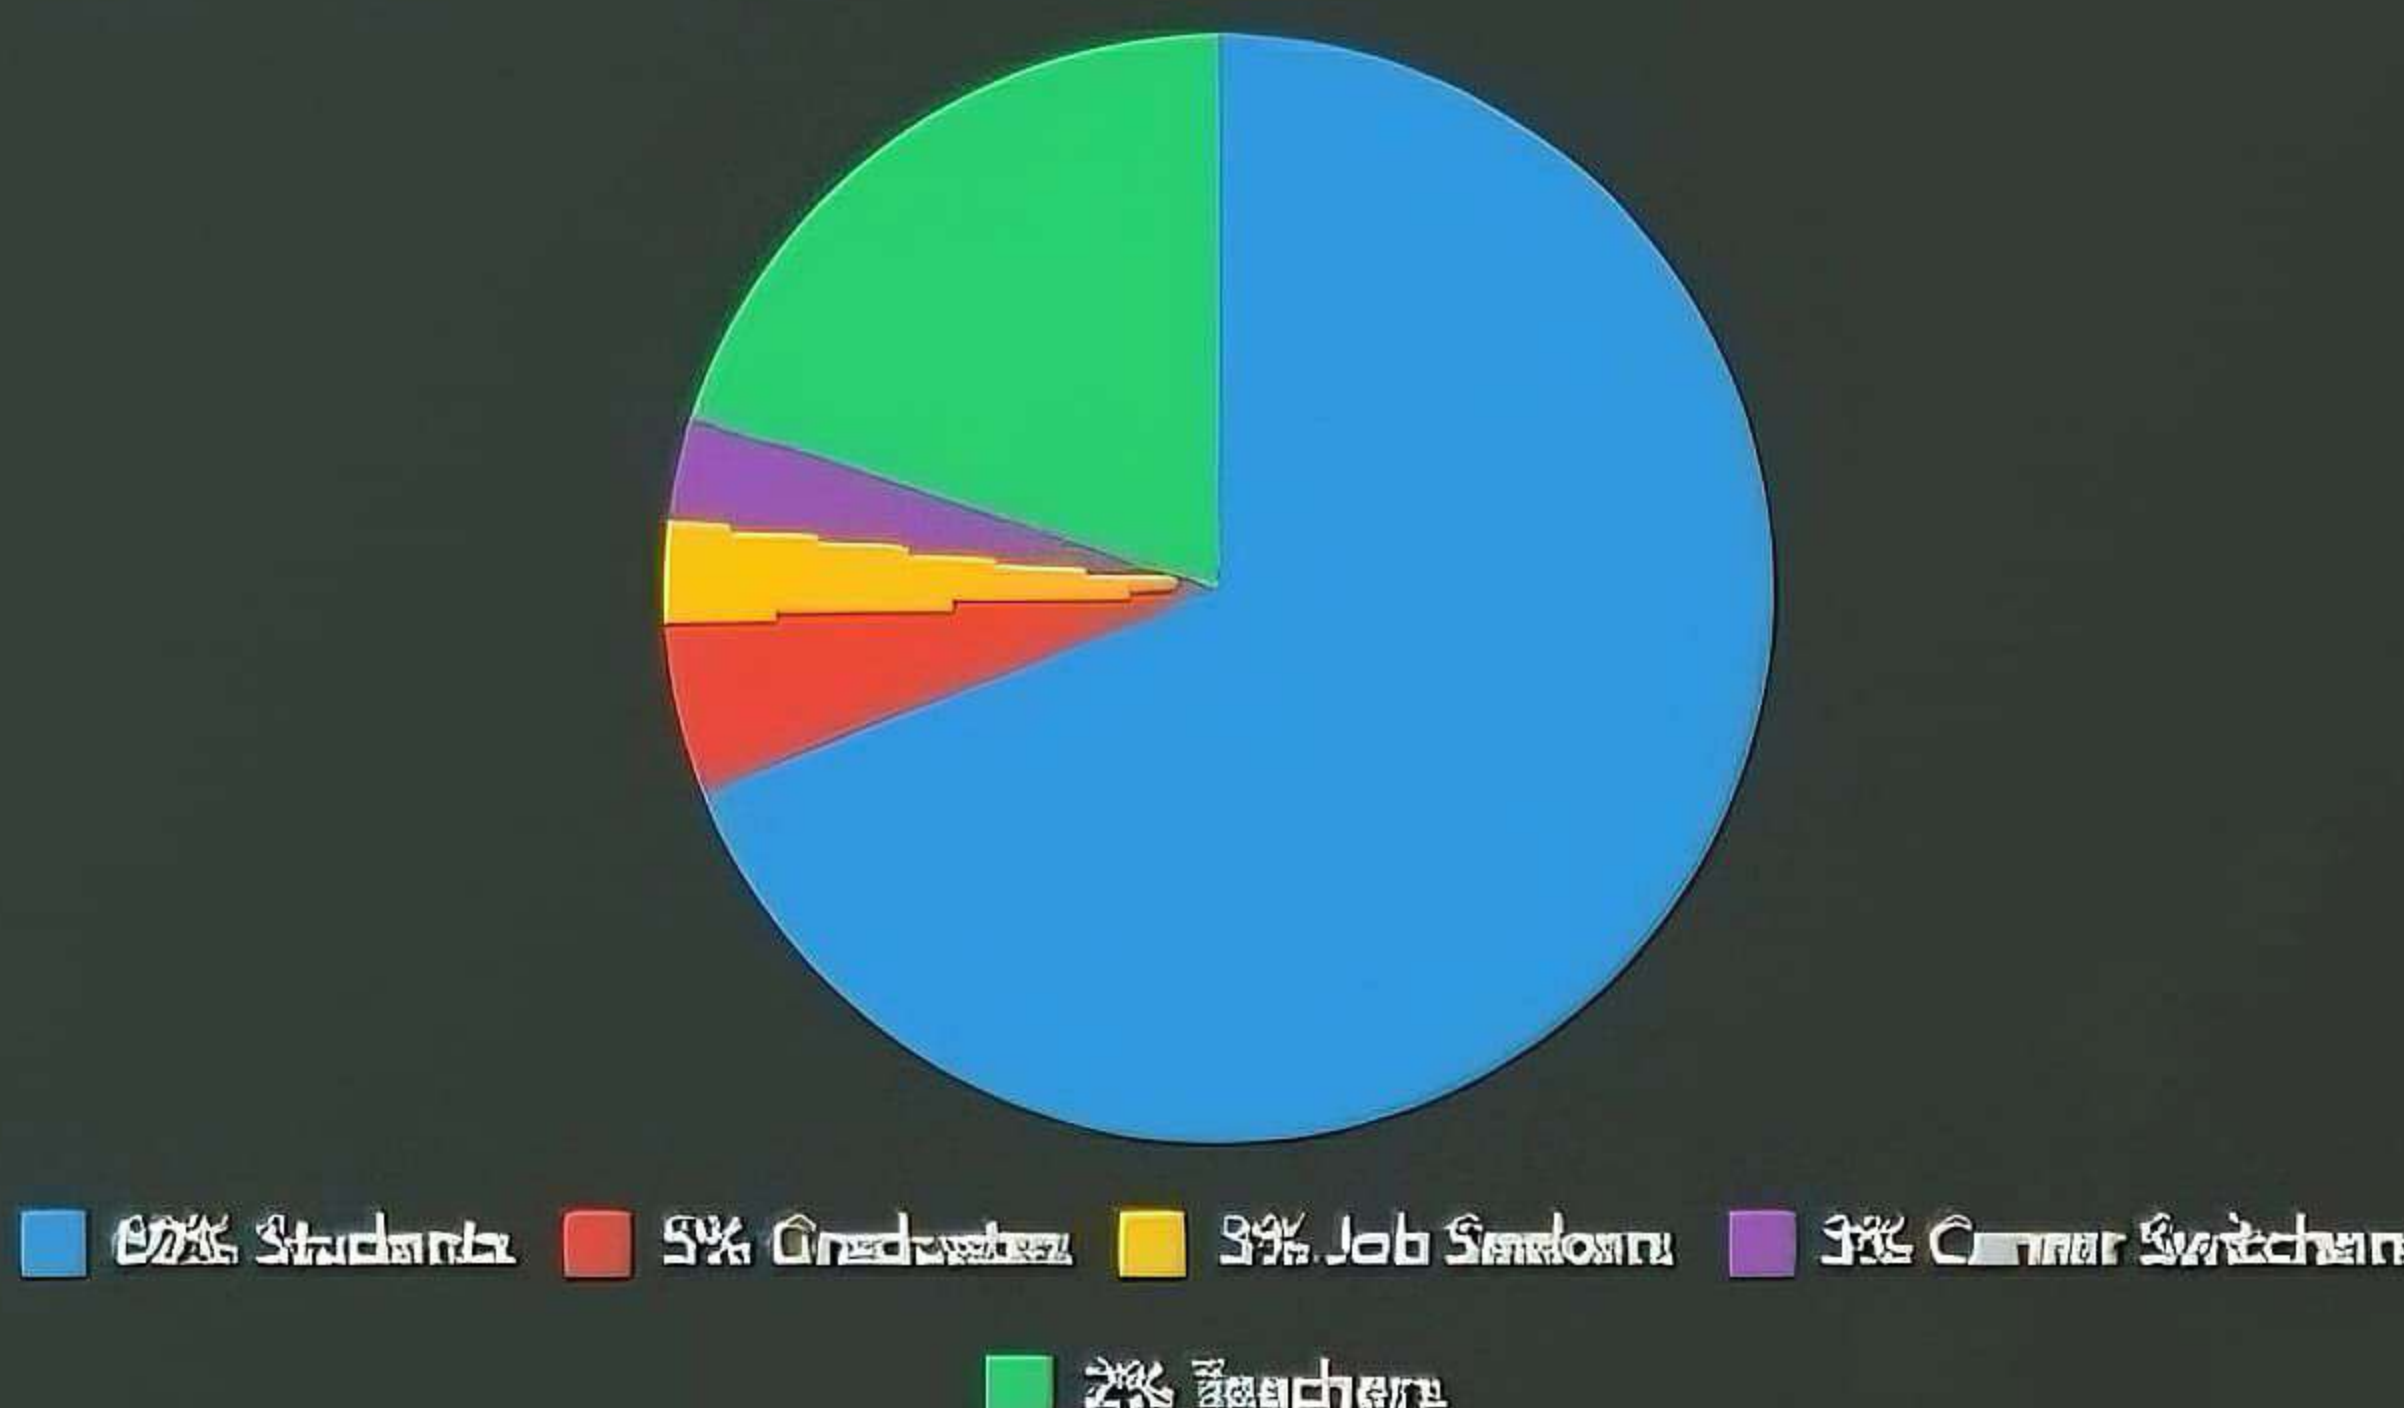

Using **MERN Stack** (MongoDB, Express.js, React.js, Node.js)

Key Development Phases:

- AI-powered CV analysis system for skill extraction and classification
- Personalized recommendation engine connecting users with targeted resources
- User-friendly interface for CV uploads, ATS feedback, and actionable recommendations

SURVEY RESULTS (206 Responses)

Respondent Profile

Most Desired Features

- 76% Personal learning paths
- 73% Practical skills
- 68% Smart suggestions
- 37% Job matching
- 27% Mentorship

Key Insights

- 59%** report difficulty following content as a major challenge with online platforms
